

Internet WiFi Setup (with router)

- ① Press the Settings icon  on the EasyTouch thermostat.
- ② Press the WiFi icon .
- ③ Press the Internet (WPS) button and proceed to the next steps below.

CONNECT TO WIFI

- ④ Press the "WPS" button on your internet router.

Note: Button location will vary depending on the brand of your router, refer to your router manual for more information.

- ⑤ Return to the thermostat display and look for either the WIFI CONNECTED! message or WiFi indicator icon at the top of the display.

Creating an Account (Smartphone)

- Download and install our free mobile application from either the Google Play or Apple's App Store.
- Locate and launch the EasyTouch RV application on your phone or smart device.
- Press the WiFi icon  and complete the EasyTouch RV account registration form.

LINK ACCOUNT

- Return to the EasyTouch display and power off the thermostat. Press the Settings  icon followed by the WiFi  icon.
- Press the "Link Account" button and then enter the 6-digit code into your EasyTouch mobile application.

DONE! You can now control your RV thermostat remotely and receive new features and updates!

Congratulations!
