HAZARDOUS INGREDIENTS	% (by weight)	CAS Number	LD ₅₀	LC ₅₀
Not Applicable (N/A)	---	---	---	---

Hazardous mixtures of other liquids, solids, or gases:

- 1.- Carbon Dioxide, Compressed, CAS# 124-38-9, UN1013

SECTION III – HAZARDS IDENTIFICATION

Liferaft contains a steel or aluminum cylinder of gas under pressure which may discharge or rupture under extreme temperatures. Keep away from flame or flame producing sources.

SECTION IV – FIRST AID MEASURES

SKIN CONTACT	N/A
EYE CONTACT	N/A
INHALATION	N/A
INGESTION	N/A

In general, liferafts present no hazards that would require first aid measures.

SECTION V – FIRE FIGHTING MEASURES

Flammable: <input type="checkbox"/> No <input checked="" type="checkbox"/> Yes - identify under which conditions	Contains gas under pressure. In a fire or if heated, a pressure increase will occur and the container may burst or explode.
Means of Extinction	Use an extinguishing agent suitable.
Special Fire Fighting Procedures:	Isolate the scene and use water spray to reduce the temperature of fire-exposed containers.

SECTION VI – ACCIDENTAL RELEASE MEASURES

Leak and Spill Procedures	Hazardous materials are contained in sealed units within packed liferaft. Spills should pose no threat if the sealed units are not breached. If compressed gas cylinder ruptures, ventilate area. Ignition sources must be avoided. Handle materials with care.
----------------------------------	---

SECTION VII - HANDLING AND STORAGE

Handling Procedures and Equipment	Do not drop the packed liferaft. Do not pull the inflation lanyard (painter line) on the raft. Only lift the packed raft by its handles if packed in a fabric valise. If raft is packed in a hard container, lift from bottom. Opening the raft valise or hard container may cause the raft to inflate. Liferaft can cause injury if inflated close to people or in a confined area. The liferaft's compressed gas cylinder is equipped with a pressure relief device. The device will vent gas from the cylinder if stored at temperatures above 130°F. The raft may partially or fully inflate if the pressure relief device activates.
Storage Requirements	These units should be stored in a cool, dry area away from danger of sparks, heat or flame.
